

Ronish Sharma

New York City | ronish.sharma@hotmail.com

I don't design single products, I design systems. Whether it's the hardware, the interface, the software, or the market it lands in, I keep the whole picture in view and make sure every part of it works together.

EDUCATION

Parsons School of Design – The New School New York, USA

BFA, Product Design, Minor: Communication Design | Expected 2027 | GPA: 3.9 | Dean's List Awardee

GEMS Dubai American Academy Dubai, UAE

IB Diploma Program | Graduated with Honors | 2023

EXPERIENCE

Primary Software Development Intern | *Spiritworks AI* | Vancouver, BC, Canada May 2026 – Present

- Design Figma prototypes and interaction flows for an orthopedic health application, translating clinical requirements into intuitive UI.
- Architect high-level system design and cloud infrastructure on Amazon Web Services, spanning front-end, middle-tier, and back-end layers.
- Design and implement agentic AI architecture, including bots and microservices, driving end-to-end automation and intelligent feature development.
- Collaborate with the product team to define sprints and shape the minimal viable presentable product, aligning engineering output with business milestones.

Product Management Extern | *BeReal* | New York City Metropolitan Area · Remote Apr 2026 – Present

- Designing and prototyping new app features to support BeReal's growth objectives, utilizing industry-standard tools.
- Facilitating focus groups and structuring surveys to evaluate prototype usability and impact, synthesizing findings into actionable outcomes.
- Developing and delivering professional proposal decks integrating research insights, competitive benchmarking, user testing outcomes, and a go-to-market rollout plan.
- Learning from top executives at BeReal including guidance from Ben Moore – US Managing Director.

Student Assistant, Admin Hub Operations | *The New School* | New York City, NY Jun 2025 – Present

- Managed 100+ weekly inquiries across in-person, email, and phone channels.
- Coordinated scheduling and operations for 17 rooms and 48 faculty workstations.
- Implemented inventory management system with cataloging and web scraping tools.
- Supported Finance, HR, and IT teams to streamline operational workflows.

Operations & Strategy Intern | *Noon AI* | New York City, NY Apr 2026 – May 2026

- Partner directly with founders to define operational priorities and execute on early-stage initiatives.
- Drive growth strategy across market positioning, user acquisition, and competitive analysis.
- Synthesize insights across product and business development to inform roadmap and go-to-market decisions.
- Build and iterate on internal operating systems to establish scalable processes during rapid growth.

Product/Industrial Design Intern | *Circular Economy Manufacturing* | New York City, NY Jun 2025 – Aug 2025

- Contributed to modular furniture product development using solar-powered rotational molding.
- Developed 10+ furniture and toy concepts using Fusion 360 and additive manufacturing.
- Operated sustainable manufacturing processes using recycled PLA, HDPE, and LDPE.
- Conducted public-facing education on circular economy systems and sustainable design.

Product Design Intern | *Studio34* | Gurugram, India Jun 2024 – Jul 2024

- Designed smart retail displays and mannequins for luxury fashion clients.
- Produced 25+ CAD-based merchandising concepts using Fusion 360 and Blender.
- Created UI/UX interfaces and visual assets using Figma and Adobe Creative Suite.
- Conducted direct client communication and iterative product refinement.

PROJECTS

TNS IRL — Product Owner | *The New School* | New York, NY Jan 2026 – Present

- Leading end-to-end product development of a mobile-first, campus-only community platform unifying event discovery, group chats, and classmate connection for all New School students, faculty, and staff.

Scout Search — Co-Founder & CMO | | Dubai, UAE Sep 2022 – Dec 2022

- Co-founded a digital football scouting platform connecting players with talent recruiters; led brand identity, go-to-market strategy, and Figma-prototyped web/mobile registration platform.

Evolution Soccer School (ESS) — UI/UX Designer | *Freelance* | Dubai, UAE Mar 2021 – Mar 2023

- Designed end-to-end UX/UI for a soccer training academy's multi-page web platform covering player and coach registration, merchandise, assessments, and contact flows.

Admin Hub Inventory System — Front-End Developer | *The New School* | New York, NY Jan 2026 – Present

- Identified a gap in inventory operations, pitched a from-scratch solution to management, and built a working prototype featuring item cataloging, location and vendor tracking, alert systems, and Amazon web scraping to surface cheaper product alternatives.

Adroit Learning — UI/UX Designer | *Freelance* | Dubai, UAE Mar 2021 – Mar 2023

- Built a tutor-student registration and scheduling system in Excel VBA, then redesigned and rebuilt it as a fully responsive desktop and mobile web app using HTML, CSS, and JavaScript.

VOLUNTEERING & LEADERSHIP

Head of STEM Department | *IDSA – The New School* | New York City, NY Sep 2024 – Sep 2025

- Led the strategic transition of Parsons' Product Design program to a STEM-designated major, coordinating partnerships with 5+ universities and developing multi-year ROI and P&L projections.

Computer Aided Design Tutor | *Yi Lin Yuan Fine Arts Studio* | Vancouver, BC Jan 2026 – Feb 2026

- Instructed 8–10 students in parametric CAD modeling across Shapr3D, Fusion 360, and SolidWorks, developing curriculum covering assemblies, tolerancing, and design-for-manufacturing principles.

SKILLS & QUALIFICATIONS

CAD & Design: Fusion 360, SolidWorks, Shapr3D, Blender, KeyShot

UI/UX & Visual: Figma, Adobe Creative Suite

Engineering & Development: HTML, CSS, C++, Arduino, ESP32, KiCad, GitHub, Google AI Lab

Prototyping: 3D Printing, Laser Cutting, PCB Design, Electronics Assembly

Manufacturing: Rotational Molding, Sustainable Materials (PLA, HDPE, LDPE)

Product Methods: Agile, Systems Thinking, Product Ownership, Cost Optimization

Certifications:

- Google UX Design Professional Certificate – Coursera
- Digital Technologies and the Future of Manufacturing – University of Michigan
- Rapid Prototyping Using 3D Printing – Arizona State University
- Fundamental Skills in Engineering Design – University of Leeds
- Digital Manufacturing and Design – University of Boston
- Advanced Prompt Engineering for Everyone – Vanderbilt University
